

How to Change a Diaper

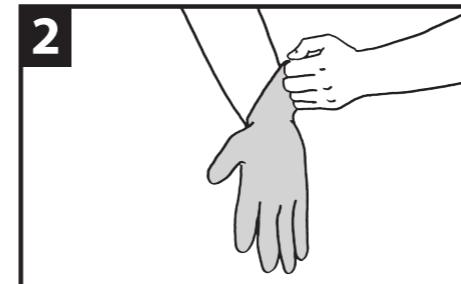

Before You Begin

Have the following supplies within reach so you can keep one hand on the baby at all times:

- A sturdy surface that can safely support the baby and can be cleaned and sanitized
- A clean diaper
- Disposable diaper wipes
- Disposable gloves
- Diaper ointment
- A garbage can, lined with a plastic bag—it should have a tight cover that opens without using your hands.

Wash your hands with soap and warm water.

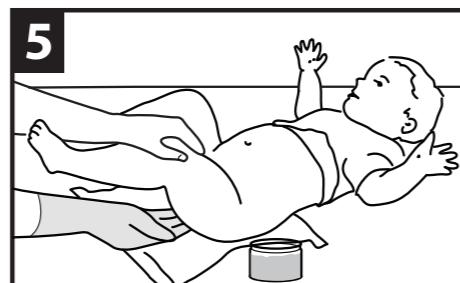

Put on disposable gloves.

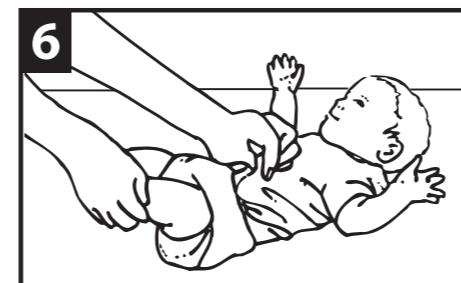

Unfasten the soiled diaper, but leave it under the baby. Use disposable wipes to clean the baby's bottom from front to back.

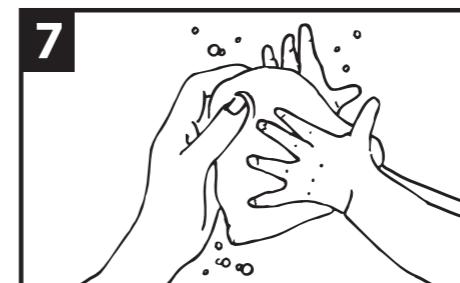

Throw away the soiled diaper and the gloves and wipes you used.

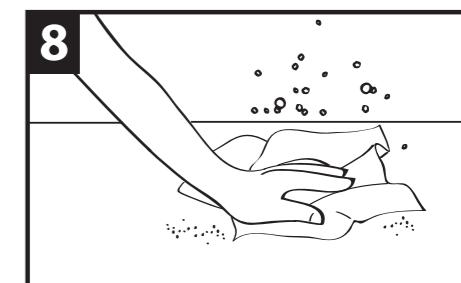

Put on a new glove if applying ointment. Throw away the glove when finished. Slide a clean diaper under the baby.

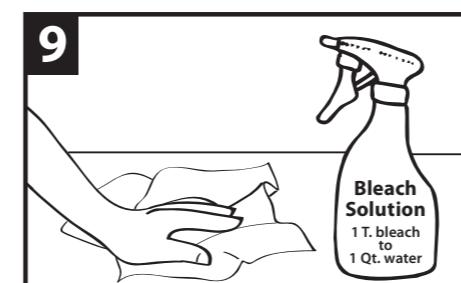

Fasten the diaper securely, making sure it's not too tight.

Wash the baby's hands with soap and warm water. Return the baby to a safe area.

Clean the changing surface with soap, warm water, and a disposable towel.

Disinfect the changing surface using a disposable towel and a solution of 1 Tbsp. chlorine bleach to 1 Qt. water.

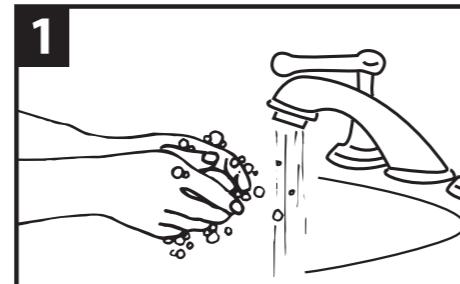

Wash your hands with soap and warm water.

Cómo cambiar un pañal

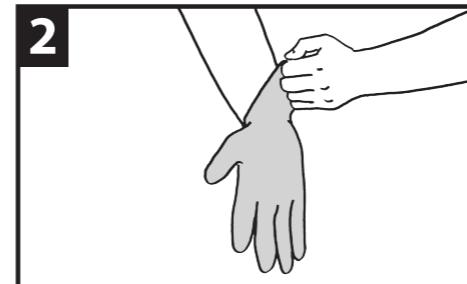

Antes de Comenzar

Como es importante mantener una mano sobre el bebé en todo momento mientras le cambie el pañal, tenga las siguientes cosas al alcance de usted:

- Una superficie firme que soporte al bebé con seguridad y que se pueda limpiar y desinfectar
- Un pañal limpio
- Toallitas desechables
- Guantes desechables
- Aceite para bebés
- Un recipiente para basura con tapa y bolsa de plástico que se abra sin tocar con las manos

Lávese las manos con jabón y agua tibia.

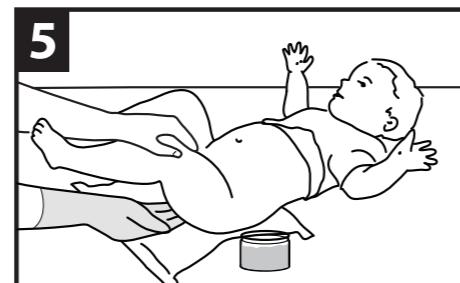

Póngase los guantes desechables.

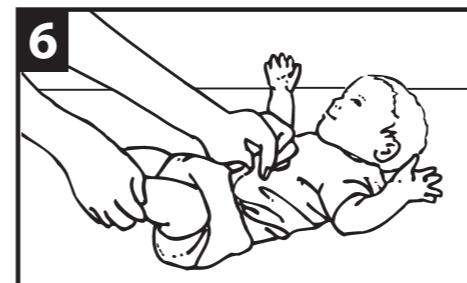

Desajuste el pañal sucio y dóblelo por debajo del bebé. Use toallitas desechables para limpiar la cola del bebé de adelante hacia atrás.

Arroje el pañal sucio, las toallitas y los guantes usados en un recipiente para basura con tapa y bolsa de plástico que se abra sin tocar con las manos.

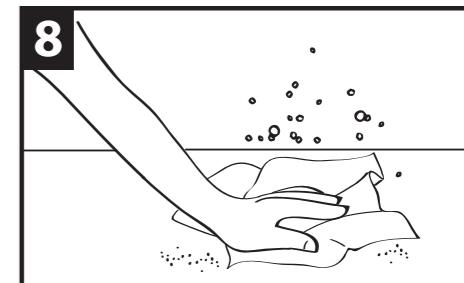

Póngase un guante nuevo si le aplica aceite. Deseche el guante cuando haya terminado. Ponga un pañal limpio por debajo del bebé.

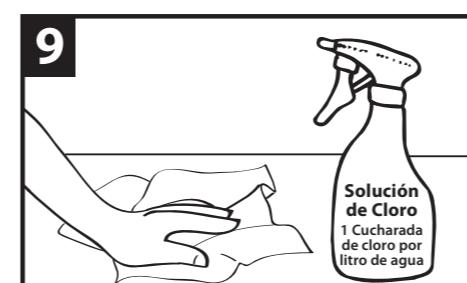

Ajuste el pañal, asegurándose de que no esté demasiado apretado.

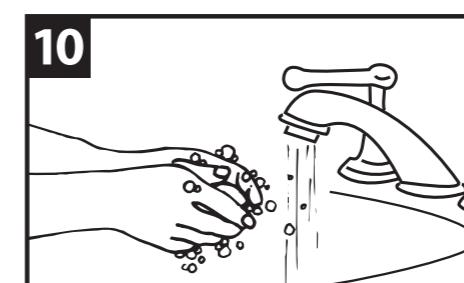

Lave las manos del bebé con jabón y agua tibia, y vuelva a colocar al bebé en un área segura.

Limpie la superficie usada con jabón, agua tibia y una toalla desechable.

Desinfecte la superficie con una cucharada de cloro en un litro de agua y una toalla desechable.

Lávese las manos con jabón y agua tibia.

Dear Colleague,

The Washington State Department of Health (DOH) provides print-ready files (PDFs) of health education materials. To ensure that the original quality of the piece is maintained, please read and follow the instructions below and the specifications included for professional printing.

- **Use the latest version.** DOH materials are developed using the most current information available, are checked for clinical accuracy, and are field tested with the intended audience to ensure they are clear and readable. DOH programs make periodic revisions to educational materials, so please check this web site to be sure you have the latest version. DOH assumes no responsibility for the use of this material or for any errors or omissions.
- **Do not alter.** We are providing this artwork with the understanding that it will be printed without alterations and copies will be free to the public. Do not edit the text or use illustrations or photographs for other purposes without first contacting us. Please do not alter or remove the DOH logo, publication number or revision date. If you want to use a part of this publication for other purposes, contact the Office of Health Promotion first.
- **For quality reproduction:** Low resolution PDF files are intended for black and white or color desktop printers. They work best if you are making only one or two copies. High resolution PDF files are intended for reproducing large quantities and are set up for use by professional offset print shops. The high resolution files also include detailed printing specifications. Please match them as closely as possible and insist on the best possible quality for all reproductions.

If you have questions, contact:
Office of Health Promotion
